

Increasing Access to Critical Postpartum Health Care for New Parents and Children

During the 2024 session, the Nebraska Legislature passed LB 1106 and LB 1107 as part of LB 1215. This legislation increases access to critical postpartum health care for new parents and children who utilize Medicaid. Starting January 1, 2025, Nebraska parents and children covered by Medicaid will be able to access a high-quality double electric personal-use breast pump before and after birth as well as a minimum of 10 lactation consultation visits.

Who qualifies?

Every pregnant Nebraskan covered by Medicaid OR, child covered by Medicaid.

When can I get a breast pump?

Qualified persons can receive a breast pump at 36 weeks gestation or on the child's date of birth, whichever is earlier.

How do I get a personal breast pump?

Get a prescription from your medical provider. If you need more information on how this works, please visit milkworks.org/what-we-do/breast-pumps-at-milkworks.html

How can I access lactation consultations?

Parents can search the **Nebraska Breastfeeding Coalition's** directory of lactation providers and filter for those who accept Medicaid. See a map of possible providers online at the link listed below.
